23rd April 1947.

Wednesday.

E.C.

Home on left of Parochial road to Mount Tappy near entrance off New Road. Thatched.

I did not propose to interview this case, of which Mrs Ashman had spoken. According to Miss Neighbourton the woman is very poor and has a large family of small children. I heard no mention, of the father, Walter Plummer. But as I was passing Mrs Gertrude Plummer hailed me and I went down and spoke to her. She said she had "too much children. It was bad luck why she had so many. She was very glib and immediately begged me for help. There was a grown up daughter in the home who also had children who were living with her. Promised to return.

April 1947.

From A.A. Enid Plummer, (whose age is now about 15) has had a baby for George Wiltshire's sister's son -- McLeish. Or so she says and he is supporting it. Or rather he gives her -- what? 2/- a week which can't keep the baby. The baby is black so it may not be ~~xxx~~ his -- he is fair. He is a married man.
